# CONTENTS

*Volume 19 Number 1* *January 1987*

| | | |
|---|---|---|
| **D. B. Alexander, D. A. Zuberer and D. M. Vietor** | 1 | Nitrogen fixation ($C_2H_2$ reduction) associated with roots of intact *Zea mays* in fritted clay at reduced oxygen tensions |
| **Barbara V. Maasdorp** | 7 | Contribution of associative $N_2$-fixation (acetylene reduction) in some grassland ecosystems in Zimbabwe |
| **J. P. Nakas, W. D. Gould and D. A. Klein** | 13 | Origin and expression of phosphatase activity in a semi-arid grassland soil |
| **J. Cortez and G. Billes** | 19 | $^{14}C$ specific activity and $^{15}N$ atom% excess in the soil microbial biomass as measured by the fumigation method and by the nucleic acid base method |
| **Jérôme Balesdent, André Mariotti and Bernard Guillet** | 25 | Natural $^{13}C$ abundance as a tracer for studies of soil organic matter dynamics |
| **J. C. Yeomans and J. M. Bremner** | 31 | Effects of dalapon, atrazine and simazine on denitrification in soil |
| **P. Ganesan and S. S. Gnanamanickam** | 35 | Biological control of *Sclerotium rolfsii* Sacc. in peanut by inoculation with *Pseudomonas fluorescens* |
| **L. H. Sørensen** | 39 | Organic matter and microbial biomass in a soil incubated in the field for 20 years with $^{14}C$-labelled barley straw |
| **D. M. Durall and D. Parkinson** | 43 | Mineralization potential in surface minespoils of the labile and recalcitrant fractions of $^{14}C$-labelled timothy (*Phleum pratense*) litter |
| **D. S. Coxson and D. Parkinson** | 49 | Winter respiratory activity in aspen woodland forest floor litter and soils |
| **Jean-Marc Bollag, Chao-Ming Chen, Jawed M. Sarkar and Michael J. Loll** | 61 | Extraction and purification of a peroxidase from soil |
| **François Gourbière et Antoine Corman** | 69 | Décomposition des aiguilles d'*Abies alba*: hétérogénéité du substrat et de la mycoflore, rôle de *Marasmius androsaceus* |
| **R. Martens** | 77 | Estimation of microbial biomass in soil by the respiration method: importance of soil pH and flushing methods for the measurement of respired $CO_2$ |
| **S. J. Chapman** | 83 | Inoculum in the fumigation method for soil biomass determination |
| **Paul Widden and Diana Hsu** | 89 | Competition between *Trichoderma* species: effects of temperature and litter type |
| **S. H. Jabaji-Hare and W. B. Kendrick** | 95 | Response of an endomycorrhizal fungus in *Allium porrum* L. to different concentrations of the systemic fungicides, metalaxyl (Ridomil®) and fosetyl-Al (Aliette®) |
| **R. Kelman Wieder, Gerald E. Lang and Valerie A. Granus** | 101 | Sulphur transformations in *Sphagnum*-derived peat during incubation |
| *Short Communications* | | |
| **Bruce W. Jarvis, Gerald E. Lang and R. Kelman Wieder** | 107 | Arylsulphatase activity in peat exposed to acid precipitation |
| **D. J. Hassett, M. S. Bisesi and R. Hartenstein** | 111 | Bactericidal action of humic acids |
| **B. S. Griffiths** | 115 | Growth of selected microorganisms and plants in soil sterilized by ethylene oxide or gamma-irradiation |
| **Announcement** | 117 | |
| **Forthcoming Papers** | 118 | |
| | i | Notes for Authors (1987) |

*Volume 19 Number 2* *March 1987*

**Thomas L. Kieft, Edith Soroker** and **Mary K. Firestone** 119 Microbial biomass response to a rapid increase in water potential when dry soil is wetted

**J. K. Fredrickson, L. F. Elliott** and **J. C. Engibous** 127 Crop residues as substrate for host-specific inhibitory pseudomonads

**A. M. O'Connell** and **T. S. Grove** 135 Seasonal variation in $C_2H_2$ reduction ($N_2$-fixation) in the litter layer of eucalypt forests of south-western Australia

**L. A. Sparrow** and **N. C. Uren** 143 Oxidation and reduction of Mn in acidic soils: effect of temperature and soil pH

**P. Christie** and **J. A. M. Beattie** 149 Significance of sample size in measurement of soil microbial biomass by the chloroform fumigation–incubation method

**Shen Shan-Min, P. C. Brookes** and **D. S. Jenkinson** 153 Soil respiration and the measurement of microbial biomass C by the fumigation technique in fresh and in air-dried soil

**D. S. Powlson, P. C. Brookes** and **B. T. Christensen** 159 Measurement of soil microbial biomass provides an early indication of changes in total soil organic matter due to straw incorporation

**Eduardo Lima, Robert M. Boddey** and **Johanna Döbereiner** 165 Quantification of biological nitrogen fixation associated with sugar cane using a $^{15}N$ aided nitrogen balance

**Maria Lucrecia G. Ramos** and **Robert M. Boddey** 171 Yield and nodulation of *Phaseolus vulgaris* and the competitivity of an introduced *Rhizobium* strain: effects of lime, mulch and repeated cropping

**Maria Lucrecia G. Ramos, Nilo F. M. Magalhães** and **Robert M. Boddey** 179 Native and inoculated rhizobia isolated from field grown *Phaseolus vulgaris*: effects of liming an acid soil on antibiotic resistance

**G. P. Robertson** and **J. M. Tiedje** 187 Nitrous oxide sources in aerobic soils: nitrification, denitrification and other biological processes

**J. A. Lewis** and **G. C. Papavizas** 195 Reduction of inoculum of *Rhizoctonia solani* in soil by germlings of *Trichoderma hamatum*

**G. B. Reddy, Alexandra Faza** and **Richard Bennett Jr** 203 Activity of enzymes in rhizosphere and non-rhizosphere soils amended with sludge

**Fatma I. El-Zamik** and **Sara F. Wright** 207 Precautions in the use of yeast extract mannitol medium for evaluation of legume seed toxicity to *Rhizobium*

**P. C. Brookes, A. D. Newcombe** and **D. S. Jenkinson** 211 Adenylate energy charge measurements in soil

*Short Communications*

**P. C. Brookes** and **S. P. McGrath** 219 Adenylate energy charge in metal-contaminated soil

**P. J. Cotterill** and **K. Sivasithamparam** 221 Take-all inoculum: its occurrence and distribution within a wheat crop and a fallow

**T. de la Rubia, J. Gonzalez-Lopez, M^a. V. Martinez-Toledo, J. Moreno** and **A. Ramos-Cormenzana** 223 Flavonoids and the biological activity of *Azotobacter vinelandii*

**Forthcoming Papers** 225

*Volume 19 Number 3* *May 1987*

**M. A. Arshad, M. Schnitzer** and **C. Preston** 227 Characteristics of a termite fungus comb studied by chemical and spectroscopic methods

**B. Söderström** and **D. J. Read** 231 Respiratory activity of intact and excised ectomycorrhizal mycelial systems growing in unsterilized soil

**A. Leonowicz** and **J.-M. Bollag** 237 Laccases in soil and the feasibility of their extraction

| | | |
|---|---|---|
| **Myra Chu-Chou** and **Lynette J. Grace** | 243 | Mycorrhizal fungi of *Pseudotsuga menziesii* in the South Island of New Zealand |
| **O. P. Rupela, B. Toomsan, S. Mittal, P. J. Dart** and **J. A. Thompson** | 247 | Chickpea *Rhizobium* populations: survey of influence of season, soil depth and cropping pattern |
| **H. Van de Werf** and **W. Verstraete** | 253 | Estimation of active soil microbial biomass by mathematical analysis of respiration curves: development and verification of the model |
| **H. Van de Werf** and **W. Verstraete** | 261 | Estimation of active soil microbial biomass by mathematical analysis of respiration curves: calibration of the test procedure |
| **H. Van de Werf** and **W. Verstraete** | 267 | Estimation of active soil microbial biomass by mathematical analysis of respiration curves: relation to conventional estimation of total biomass |
| **J. H. A. Butler** | 273 | The effect of defoliation on growth and $N_2$ fixation by *Medicago* sp. grown alone or with ryegrass |
| **Mª. C. Trasar-Cepeda** and **F. Gil-Sotres** | 281 | Phosphatase activity in acid high organic matter soils in Galicia (NW Spain) |
| **Hakam S. Modjo, James W. Hendrix** and **William C. Nesmith** | 289 | Mycorrhizal fungi in relation to control of tobacco stunt disease with soil fumigants |
| **Keith Jones** and **James W. Hendrix** | 297 | Inhibition of root extension in tobacco by the mycorrhizal fungus *Glomus macrocarpum* and its prevention by benomyl |
| **S. J. Chapman** | 301 | Microbial sulphur in some Scottish soils |
| **Craig S. Rothrock** | 307 | Take-all of wheat as affected by tillage and wheat–soybean doublecropping |
| **A. H. Sheikh** and **A. Ghaffar** | 313 | Time–temperature relationships for the inactivation of sclerotia of *Macrophomina phaseolina* |
| **Martin Wood** and **Gemma Shepherd** | 317 | Characterization of *Rhizobium trifolii* isolated from soils of different pH |
| **I. Mueller-Harvey** and **A. Wild** | 323 | Isolation of a new sugar phosphate from forest leaf litter in Nigeria |
| **Rebecca J. Thomas** | 329 | Distribution of *Termitomyces* Heim and other fungi in the nests and major workers of *Macrotermes bellicosus* (Smeathman) in Nigeria |
| **Rebecca J. Thomas** | 335 | Distribution of *Termitomyces* and other fungi in the nests and major workers of several Nigerian macrotermitinae |
| **Rebecca J. Thomas** | 343 | Factors affecting the distribution and activity of fungi in the nests of macrotermitinae (Isoptera) |
| *Short Communication*<br>**Arnold F. Dijkstra, Johanna M. Govaert, Grada H. N. Scholten** and **Jan D. Van Elsas** | 351 | A soil chamber for studying the bacterial distribution in the vicinity of roots |
| **Forthcoming Papers** | 353 | |

*Volume 19 Number 4* *July 1987*

| | | |
|---|---|---|
| **F. Bartoli, A. Hatira, J. C. Andre** et **J. M. Portal** | 355 | Propriété fluorescentes et colloïdales d'une solution organique de podzol au cours du processus de complexation par le cuivre |
| **A. Simon, A. D. Rovira** and **R. C. Foster** | 363 | Inocula of *Gaeumannomyces graminis* var. *tritici* for field and glasshouse studies |
| **R. Merckx** and **J. K. Martin** | 371 | Extraction of microbial biomass components from rhizosphere soils |
| **G. A. Breitenbeck** and **J. M. Bremner** | 377 | Effects of storing soils at various temperatures on their capacity for denitrification |

**P. V. Tearle** 381 Cryptogamic carbohydrate release and microbial response during spring freeze–thaw cycles in Antarctic fellfield fines

**A. N. Yousef, A. S. Al-Nassiri, S. K. Al-Azawi and N. Abdul-Hussain** 391 Abundance of peanut *Rhizobium* as affected by environmental conditions in Iraq

**D. J. Ross** 397 Soil microbial biomass estimated by the fumigation–incubation procedure: seasonal fluctuations and influence of soil moisture content

**K. Reichardt, G. Hardarson, F. Zapata, C. Kirda and S. K. A. Danso** 405 Site variability effect on field measurement of symbiotic nitrogen fixation using the $^{15}N$ isotope dilution method

**S. K. A. Danso, F. Zapata, G. Hardarson and M. Fried** 411 Nitrogen fixation in fababeans as affected by plant population density in sole or intercropped systems with barley

**R. Azcón** 417 Germination and hyphal growth of *Glomus mosseae in vitro*: effects of rhizosphere bacteria and cell-free culture media

**H. M. Abdelmagid and M. A. Tabatabai** 421 Nitrate reductase activity of soils

**Bent T. Christensen** 429 Decomposability of organic matter in particle size fractions from field soils with straw incorporation

**F. Y. Kassaby and G. Hepworth** 437 *Phytophthora cinnamomi*: effects of herbicides on radial growth, sporangial production, inoculum potential and root disease in *Pinus radiata*

**Peter A. H. M. Bakker, Albert W. Bakker, Joey D. Marugg, Peter J. Weisbeek and Bob Schippers** 443 Bioassay for studying the role of siderophores in potato growth stimulation by *Pseudomonas* spp in short potato rotations

**Albert W. Bakker and Bob Schippers** 451 Microbial cyanide production in the rhizosphere in relation to potato yield reduction and *Pseudomonas* spp-mediated plant growth-stimulation

**K. E. Giller and J. F. Witty** 459 Immobilized $^{15}N$-fertilizer sources improve the accuracy of field estimates of $N_2$-fixation by isotope dilution

**J. Skujiņš, C. C. Tann and I. Börjesson** 465 Dinitrogen fixation in a montane forest sere determined by $^{15}N_2$ assimilation and *in situ* acetylene-reduction methods

*Short Communications*

**J. K. Martin** 473 Effect of plants on the decomposition of $^{14}C$-labelled soil organic matter

**P. Hand and W. A. Hayes** 475 Production of axenic earthworms by antibiotic treatment

**Y. H. Rhee, Y. C. Hah and S. W. Hong** 479 Relative contributions of fungi and bacteria to soil carboxymethylcellulase activity

**Forthcoming Papers** 483

*Volume 19 Number 5* *September 1987*

**D. C. Grobler, D. F. Toerien and V. R. Smith** 485 Bacterial activity in soils of a sub-Antarctic island

**N. Maire** 491 Évaluation de la vie microbienne dans les sols par un système d'analyses biochimiques standardisé

**R. D. Lumsden, R. García-E., J. A. Lewis and G. A. Frías-T.** 501 Suppression of damping-off caused by *Pythium* spp in soil from the indigenous Mexican chinampa agricultural system

**P. R. Herrington, J. T. Craig and J. E. Sheridan** 509 Methyl vinyl ketone: a volatile fungistatic inhibitor from *Streptomyces griseoruber*

**G. Almendros and F. J. González-Vila** 513 Degradative studies on a soil humin fraction—sequential degradation of inherited humin

| | | |
|---|---|---|
| **R. J. Raison, M. J. Connell** and **P. K. Khanna** | 521 | Methodology for studying fluxes of soil mineral-N *in situ* |
| **S. C. Schindler** and **M. J. Mitchell** | 531 | Dynamics of $^{35}S$ in horizons and leachates from a hardwood forest Spodosol |
| **Irene Koomen, Carol Grace** and **D. S. Hayman** | 539 | Effectiveness of single and multiple mycorrhizal inocula on growth of clover and strawberry plants at two soil pHs |
| **E. R. Ingham** and **K. A. Horton** | 545 | Bacterial, fungal and protozoan responses to chloroform fumigation in stored soil |
| **Leif Klemedtsson, Per Berg, Marianne Clarholm, Johan Schnürer** and **Thomas Rosswall** | 551 | Microbial nitrogen transformations in the root environment of barley |
| **J. A. van Veen, J. N. Ladd, J. K. Martin** and **M. Amato** | 559 | Turnover of carbon, nitrogen and phosphorus through the microbial biomass in soils incubated with $^{14}C$-, $^{15}N$- and $^{32}P$-labelled bacterial cells |
| **Margaret E. Brown** and **D. Hornby** | 567 | Effects of nitrate and ammonium on wheat roots in gnotobiotic culture: amino acids, cortical cell death and take-all (caused by *Gaeumannomyces graminis* var. *tritici*) |
| **A. R. J. Eaglesham, M. D. Stowers, M. L. Maina, B. J. Goldman, M. J. Sinclair** and **A. Ayanaba** | 575 | Physiological and biochemical aspects of diversity of *Bradyrhizobium* sp. (*Vigna*) from three West African soils |
| **J. B. deCatanzaro, E. G. Beauchamp** and **C. F. Drury** | 583 | Denitrification vs dissimilatory nitrate reduction in soil with alfalfa, straw, glucose and sulfide treatments |
| **Björn Berg, Michael Müller** and **Bengt Wessén** | 589 | Decomposition of red clover (*Trifolium pratense*) roots |
| **L. L. Hendrickson** and **M-J. O'Connor** | 595 | Urease inhibition by decomposition products of phenylphosphorodiamidate |
| **A. W. West, G. P. Sparling** and **W. D. Grant** | 599 | Relationships between mycelial and bacterial populations in stored, air-dried and glucose-amended arable and grassland soils |
| **A. W. West, W. D. Grant** and **G. P. Sparling** | 607 | Use of ergosterol, diaminopimelic acid and glucosamine contents of soils to monitor changes in microbial populations |
| **Keith Paustian** and **Johan Schnürer** | 613 | Fungal growth response to carbon and nitrogen limitation: a theoretical model |
| **Keith Paustian** and **Johan Schnürer** | 621 | Fungal growth response to carbon and nitrogen limitation: application of a model to laboratory and field data |
| **Vera N. Krasovsky** and **G. Stotzky** | 631 | Conjugation and genetic recombination in *Escherichia coli* in sterile and nonsterile soil |
| **Jan D. van Elsas, Johanna M. Govaert** and **Johannes A. van Veen** | 639 | Transfer of plasmid pFT30 between bacilli in soil as influenced by bacterial population dynamics and soil conditions |
| *Short Communications* | | |
| **Peter Holter** and **Niels Bohse Hendriksen** | 649 | Field method for measuring respiratory loss and bulk export of organic matter from cattle dung pats |
| **J. K. Martin** and **J. Sinnaeve** | 651 | Removal of ethylene from the atmosphere of controlled environment chambers operated with full air recirculation |
| **Book Review** | 653 | |
| **Forthcoming Papers** | 655 | |

| | | |
|---|---|---|
| **Averil E. Brown, Ruth Finlay and J. S. Ward** | 657 | Antifungal compounds produced by *Epicoccum purpurascens* against soil-borne plant pathogenic fungi |
| **G. A. Keen and J. I. Prosser** | 665 | Interrelationship between pH and surface growth of *Nitrobacter* |
| **L. E. Woods, C. V. Cole, L. K. Porter and D. C. Coleman** | 673 | Transformations of added and indigenous nitrogen in gnotobiotic soil: a comment on the priming effect |
| **S. Elmholt and A. Kjøller** | 679 | Measurement of the length of fungal hyphae by the membrane filter technique as a method for comparing fungal occurrence in cultivated field soils |
| **Kassem Alef and Diethelm Kleiner** | 683 | Estimation of anaerobic microbial activities in soils by arginine ammonification and glucose-dependent $CO_2$-production |
| **Praveen-Kumar, P. K. Chhonkar and N. P. Agnihotri** | 687 | Mobility of urease inhibitors: application of soil thin-layer chromatography |
| **E. D. Vance, P. C. Brookes and D. S. Jenkinson** | 689 | Microbial biomass measurements in forest soils: determination of $k_C$ values and tests of hypotheses to explain the failure of the chloroform fumigation–incubation method in acid soils |
| **E. D. Vance, P. C. Brookes and D. S. Jenkinson** | 697 | Microbial biomass measurements in forest soils: the use of the chloroform fumigation–incubation method in strongly acid soils |
| **E. D. Vance, P. C. Brookes and D. S. Jenkinson** | 703 | An extraction method for measuring soil microbial biomass C |
| **Mark R. Walbridge and Peter M. Vitousek** | 709 | Phosphorus mineralization potentials in acid organic soils: processes affecting $^{32}PO_4^{3-}$ isotope dilution measurements |
| **Robert L. Sinsabaugh and Arthur E. Linkins** | 719 | Inhibition of the *Trichoderma viride* cellulase complex by leaf litter extracts |
| **D. J. Lodge** | 727 | Nutrient concentrations, percentage moisture and density of field-collected fungal mycelia |
| **O. Yarden, N. Aharonson and J. Katan** | 735 | Accelerated microbial degradation of methyl benzimidazol-2-ylcarbamate in soil and its control |
| **M. H. Opperman, L. McBain and M. Wood** | 741 | Movement of cattle slurry through soil by *Eisenia foetida* (Savigny) |
| **A. Ordentlich, Y. Elad and I. Chet** | 747 | Rhizosphere colonization by *Serratia marcescens* for the control of *Sclerotium rolfsii* |
| **J. C. Ryden, J. H. Skinner and D. J. Nixon** | 753 | Soil core incubation system for the field measurement of denitrification using acetylene-inhibition |
| **Louise M. Nelson** | 759 | Response of *Rhizobium leguminosarum* isolates to different forms of inorganic nitrogen during nodule development in pea (*Pisum sativum* L.) |
| **A. T. Kuiters and C. A. J. Denneman** | 765 | Water-soluble phenolic substances in soils under several coniferous and deciduous tree species |
| *Short Communications* | | |
| **T. C. Strickland and J. W. Fitzgerald** | 771 | Bacterial production of organic sulphur in a forest litter extract |
| **M. H. Opperman** | 775 | Laboratory storage of the earthworm *Eisenia foetida* (Savigny) and removal of micro-organisms by antibiotics |
| **P. Christie** | 777 | C:N ratios in two contrasting Antarctic peat profiles |
| **J. W. Fitzgerald and T. C. Strickland** | 779 | Mineralization of organic sulphur in the O2 horizon of a hardwood forest: involvement of sulphatase enzymes |

*Comment*
**K. E. Giller** 783 Use and abuse of the acetylene reduction assay for measurement of "associative" nitrogen fixation

**Announcement** 785

**Forthcoming Papers** 786
